

**Instructions:**

1. Unscramble each of the clue words.
2. Copy the letters that appear in the boxes above a number into the answer section. For example, if the letter “A” appears in above the number “4”, the copy “A” into the 4<sup>th</sup> box in the answer section.
3. After you have copied all the letters into the answer section, the answer to the question will be revealed.

**Question:** What is something, found in milk, that helps to build healthy bones and teeth?

ANSWER

1	2	3	4	5	6	7	

Need some help? Here are some clues:

- First word: A sharp tooth used for cutting food.
- Second word: A large tooth used for mashing food.
- Third word: The white part of the tooth you brush everyday.
- Fourth word: Eight of these teeth are the center of your smile.
- Fifth word: Most of a tooth is made of this tissue.
- Sixth word: This tissue is found in the center of a tooth.
- Seventh word: This is the tissue your teeth sit in.
